

Vaccination for COVID-19

The Rocky Mountain Seniors Ski Club, while an inclusive organization, recognizes the importance of providing a safe environment for participants and following public health recommendations to protect our membership, who may have particular health vulnerabilities as seniors.

Given this, the RMSSC currently requires participants in all Club events and activities to be fully vaccinated for COVID-19, to declare their vaccination status when registering for the event or activity, and to present valid proof of vaccination and valid photo ID upon request at time of check-in.

As of October 1, 2021, “fully vaccinated” means vaccination with:

- two doses of the Pfizer-BioNTech (Comirnaty), Moderna (SpikeVax) or AstraZeneca (Vaxzevria/Covishield) vaccine, or a combination of these, with the second dose administered at least 14 days prior to the event or activity.
- a single dose of the Johnson & Johnson vaccine (Janssen), administered at least 14 days prior to the event or activity.

These requirements align with Alberta’s Restriction Exemption Program (REP) and British Columbia’s proof of vaccination protocols for interprovincial visitors.
